These issues may include current or pending legal, school, or family issues. To achieve programming that meets the needs of each individual youth, is evidence based, and easily understood, PRTF-Huron's foundation in programming is based on Positive Peer Culture which emphasizes a therapeutic group milieu which focuses on respect for self and others and development of care and concern. The Positive Peer Culture modality assists in meeting the universal growth needs of youth for affiliation, achievement, autonomy and altruism through improvement in social competence and cultivating identified strengths in youth. The goal for youth in the program is to utilize Positive Peer Culture to guide youth into developing healthier mindsets and coping skills for identified treatment need(s). Youth will also be introduced to additional trauma informed practices, which are complimentary and in accord with Positive Peer Culture to meet individualized treatment planning goals. These practices include various identified clinical assessments, individual and group therapy sessions, and individualized assignments. A multidisciplinary treatment team overseen by a Clinical Psychologist and Medical Director works with the youth and family to design a treatment plan that addresses each youth's individual needs and objectives for success.**Coverage Area:** South Dakota**Credentialed Professionals:** Jesse Olsen, MSW Kristen Schroeder, MSW, CSW, QMHP**Counseling Services offered at Rising Hope Counseling, LLC**

**Services Offered:** MAT (Medication Assisted Treatment) is offered to people who have moderate to severe opioid dependence. Because there is a complex relationship between health, mental health, and addiction, this treatment provides an integrated approach that focuses on the whole person. There are three ways to schedule an appointment with LCBHS:

- Call to schedule an appointment
- Referral from your healthcare provider
- Referral following a treatment needs assessment from an accredited Substance Use Treatment Provider

Individuals can often be seen on the same day that you call or are referred. Everyone will receive an assessment to determine whether or not MAT is appropriate/to help determine the most appropriate level of care. If MAT is determined to be an option, staff provide education about the different forms of MAT.

Two forms of MAT are offered at LCBHS:

- Treatment with Buprenorphine
- Treatment with short- or long-acting Naltrexone

A plan is developed with the patient's provider for the specific form of MAT treatment, level of care, and length of service based on your individual needs. Initial drug screening is required as are laboratory studies depending on history and type of MAT. Ongoing random drug testing is an integral part of treatment. Medically monitored withdrawal management is provided in a residential setting and is available if needed. There is not a set length of time for MAT. While many people may need to stay on medication indefinitely, others may choose to taper off or discontinue using MAT medications.

**Services Offered:** ASIST is an Applied Suicide Intervention Skills Training designed to provide a practical face-to-face intervention model for caregivers to use when encountering a person at-risk of suicide. CEUs and undergraduate and graduate credit are available for this training.

Means Safety Training - Means safety is a critical component of suicide prevention that focuses on limiting access to lethal means, thereby reducing the risk of self-harm and suicide. It acknowledges that restricting access to potentially harmful items or methods can play a pivotal role in preventing impulsive and irreversible actions.

Mental Health First Aid is the initial help given to a person showing symptoms of mental illness or in a mental health crisis until appropriate professional, peer or family support can be engaged. This course prepares participants to provide Mental Health First Aid to those in need. Specialized version for law enforcement available.

Safety Planning - Learn how to help someone at risk develop a set of concrete strategies to decrease the risk of suicidal behavior. The safety plan includes coping strategies that may be used and individuals or agencies that may be contacted during a crisis. Target audience would be any behavioral health or health staff.

QPR (Question, Persuade and Refer) are three steps anyone can learn to help prevent suicide. QPR is an emergency response to someone in crisis and can save lives. Participants learn about the nature of suicidal communications, what forms these communications take and how they may be used as a stimulus for a QPR intervention.

Youth Mental Health First Aid is a course emphasizing the importance of early intervention and reviewing the unique risk factors and warning signs of mental health problems in adolescents ages 12-18. It is intended for anyone 16 years or older.

Critical Incidence Training for Police Agencies - CIT is a training provided to law enforcement personnel on appropriate emergency response to someone in crisis that can help save lives. Additionally, participants learn directly from a suicide attempt survivor about what responses may and may not be perceived as helpful, and hear from a suicide loss survivor about the collateral impact of suicide.

Customized presentations on suicide information, crisis and prevention are available upon request.
