A comprehensive substance abuse program offering addiction prevention, treatment, and recovery support services for adolescents and adults experiencing problems with alcohol and drugs. Traditional concepts of health among many American Indian families within the Pine Ridge Tribal Lands involve the intersection of physical, mental, and spiritual wellbeing, which are all seen as inextricably linked. Therefore, ALO uses a comprehensive approach for behavioral health programming, which is guided by traditional Lakota values (i.e. waca'ognaka (generosity), woohitika (courage), wowaci'ta'ka (perseverance), waoholaka (respect), wau'sila (compassion), and woksape (wisdom).

Prevention services include:
-Prevention:
  -Aims to delay the initiation and/or progression ATODs. Prevention initiatives can be implemented at the population level as well as within the small group setting. Anpetu Luta Otipi's strategy for prevention includes: 1. Developing the capacity of prevention stakeholders to plan and implement evidence based prevention practices; 2. Promote policies that promote the health of the public and restrict access to ATODs; 3. Health promotion/disease prevention through social Marking and health communication; and 4 facilitation of cultural-based alcohol and drug free events that communicate public health messages.

- Early Intervention:
  -Aims to curb at risk behavior (i.e. binge drinking) that has not yet become a disorder (i.e. alcoholism). Early Intervention services are delivered in groups or one-on-one with clients. Early Intervention links the client with both internal and/or external resources that are the most appropriate for his/her situation. Offers 2 types of early interventions:
